Career Objective

Data-driven MCA student with hands-on experience in Python, SQL, and machine learning, and a proven track record of improving operational efficiency through analytics. Seeking to leverage analytical and problem-solving skills to build scalable and data-centric solutions.

Education

Master of Computer Applications - **CGPA 9.31**

KL University | 2024 - 2026

BSc Computer Science – **CGPA 8.65**

Andhra Loyola College | 2021 - 2024

Technical Skills

- Programming Languages: Python, Java, C
- Web Technologies: HTML, CSS, JavaScript, Django
- Data & Analytics: SQL, Pandas, NumPy, EDA, Regression, Machine Learning
- Tools & Platforms: GitHub, Jupyter Notebook, MS Excel
- Visualization: Matplotlib, Seaborn, Plotly

Experience

AI/ML Intern | Datavalley | Vijayawada, India **May 2025 – July 2025**

- Contributed to the development and deployment of machine learning models for classification and prediction tasks.
- Performed exploratory data analysis, data preprocessing, and feature engineering to improve data quality and model accuracy.
- Applied hyperparameter tuning techniques to optimize model performance.
- Worked with tools and libraries including Python, Streamlit, Pandas, and Matplotlib to build interactive and efficient solutions.

Data Analyst Intern | R K Metal Works | Vijayawada, India **May 2023 – June 2023**

- Analyzed manufacturing data to identify bottlenecks and improved operational efficiency by 15 percent.
- Designed scrap utilization strategies that reduced waste by 25 percent and saved approximately ₹1.5 lakh.
- Created reporting dashboards that improved the speed and accuracy of decision-making by 25 percent.
- Collaborated with cross-functional teams to reduce operational delays by 30 percent.

PROJECTS

Multilingual Sign Language Translator

- Built an AI-based real-time system for Indian Sign Language (ISL) ↔ speech/text translation
- Developed LSTM model using MediaPipe keypoints and iSign dataset
- Implemented full-stack solution with Flask, TensorFlow.js, and SQLite
- Enabled multilingual output (8 languages) with speech-to-sign and sign-to-text features

Food Donation Platform

- Developed a full-stack web application using Django and MySQL to connect food donors with NGOs.
- Implemented secure authentication and role-based access control for different user types.
- Designed admin dashboard to track donations, improving coordination efficiency.
- Focused on solving real-world problem of food wastage and distribution.

Brazilian Real Estate Market Analysis

- Analyzed 21,000+ property records using Pandas and visualization libraries
- Performed data cleaning, feature engineering, and trend analysis
- Identified location-based pricing patterns to support investment decisions

Supermarket Sales Analysis

- Performed sales forecasting using Python and Pandas
- Applied customer segmentation techniques to identify purchasing patterns
- Created visualizations to present insights and business recommendations

CERTIFICATIONS

- Java Programming - NPTEL
- Foundations: Data, Data, Everywhere – Google
- Python for Data science – NPTEL
- Certified Advanced Automation Professional - Automation Anywhere
